Advanced Search Tool - Search for contacts by any of their listed information. Just start typing in who or what you're looking for, and let the Advanced Search Tool do the rest.

Contact Directory - Sort your Contact Directory by name, by most paged, or by five customizable options of your choice. Export your Contact Directory to a csv file for archiving, or use it to quickly change Contact Devices, Permissions, or Security Settings. Once you've made your changes, import the updated csv file to quickly edit the Contact Directory.

Message Log - Keeps detailed records of all messages sent. Logged by contact sender, date, time, and contact recipient. Locate specific messages in the log with the Advanced Search Tool. Export the logs to csv format for archiving and documentation.

Event Scheduling - Easily switch on call devices or personnel by creating an event schedule. Automatically reassigns active messaging devices or contacts based on your customized schedule ensuring the appropriate device or person gets paged at the time the message is sent.

Custom Groups - Need to message multiple contacts on a regular basis? Just create a group in Total Access Portal and message everyone with one click!

Scheduled Messaging - Need to send a message out at a specific time? Use our new Scheduled Messaging to pick the date and time you want the message to send. View messages scheduled to be sent in the Message Queue.
